ELAC Named 2023 Champion for Excelling in Equitable Course Placement

ELAC was named as a 2023 champion of higher education by the Campaign for College Opportunity. The award was given for Equity Designation: Black Transfer-Level English Enrollment – California Community Colleges supporting 100% of Black students to enroll directly in transfer-level English.

ELAC was one of 56 California Community Colleges to earn this honor this year and they will be honored at an awards show on May 31st. Community college campuses will be honored for implementing landmark placement policy AB 705, championed by Assemblymember Jacqui Irwin and signed into law in 2017.

Prior to AB 705, the vast majority of incoming community college students were being placed into remedial math and English courses that ultimately discouraged and derailed students on their college journeys. Over a decade of research has shown that students' likelihood of earning a degree decreases when they start college in remedial courses.

Employee Recognition – Harbor Celebrates its Staff

Harbor held its annual employee recognition ceremony where faculty and staff members were recognized for their years of service and hard work. We commemorated the following for their dedication to Harbor, their achievements and contributions as they retire: Nabeel Barakat, Dr. Chelvi

[They are ready for the Culinary Cup!](#) The top honor, Employee of the Year, went to Administrative Assistant Leslie Fernandez. Leslie has been a huge asset to Harbor and is truly deserving of the award for her dedication to her role and for helping the campus run smoothly. We can't think of anyone who deserves it more!

Trade-Tech in the News!

Earlier in the semester, Spectrum News 1 SoCal visited Trade-Tech’s Construction, Maintenance, and Utilities pathway for a special news feature. The story was based on recent research from the Pew Research Center indicating that Gen Z (those born between 1997 and 2012) is projected to be the most well-educated generation with fewer students opting for trade careers.

Trade-Tech's bustling Carpentry program, however, shows the continued interest of students opting into exciting, hands-on careers, and the programs offered at Trade-Tech. “Work needs to be done. Someone is always going to need a plumber; someone is always going to need a carpenter,” says second-semester Carpentry student Cesar Garcia.
