

# SAFEGUARD DENTAL PLAN

## How The Plan Works

Safeguard is a prepaid, “HMO-style” dental plan. You may receive dental care from any dentist in your Safeguard Dental HMO booklet. Just remember: You are covered only when you use a dentist who currently participates in the Safeguard network (except for emergency care).

With Safeguard, you pay no deductibles and your copayments are nominal, if any. There are no annual benefit maximums, no claim forms and you do not need to obtain authorization for most service before receiving treatment.

## Safeguard Dental
