| **Is there an out-of-pocket limit on my expenses?** | Yes. **For Medical Services/Expenses:** For In Network HMO Providers: **$1,500** Single/ **$3,000** Family  
**No Out Of Pocket Limit** when using Non-HMO Providers.  
**For Pharmacy/Prescription Expenses:** **$5,100** Single/$**10,200** Family | The out-of-pocket limit is the most you could pay during a coverage period (usually one year) for your share of the cost of covered services with participating providers. This limit helps you plan for health care expenses. |
| **What is not included in the out-of-pocket limit?** | Infertility services, Premiums, Balance-Billed Charges, and Health Care this Plan Doesn’t Cover. | Even though you pay these expenses, they don’t count toward the out-of-pocket limit. |
| **Is there an overall annual limit on what the plan pays?** | No | The chart starting on page 2 describes any limits on what the plan will pay for. |
| **Does this plan use a network of providers?** | Yes. Anthem Blue Cross Traditional HMO [www.anthem.com/ca/calpers/hmo](http://www.anthem.com/ca/calpers/hmo) or call 1-855-839-4524 for a list. | You will choose a primary care physician (PCP) who is part of an Anthem Blue Cross Traditional HMO contracting medical group. |

### Do I need a referral to see a specialist?

Yes, unless the specialist is in the “Direct Access” or “Speedy Referral” Programs. Specialist medical care will not be covered without a referral or PCP/Medical Group authorization.

### Are there services this plan doesn’t cover?

Yes. Some of the services this plan doesn’t cover are listed on page 6. See your policy or plan document for additional information about excluded services.

- **Copayments** are fixed dollar amounts (for example, $15) you pay for covered health care, usually when you receive the service.
- **Coinsurance** is your share of the costs of a covered service, calculated as a percent of the **allowed amount** for the service. For example, if the plan’s **allowed amount** for an overnight hospital stay is $1,000, your **coinsurance** payment of 20% would be $200. This may change if you haven’t met your **deductible**.
- The amount the plan pays for covered services is based on the **allowed amount**. If an out-of-network **provider** charges more than the **allowed amount**, you may have to pay the difference. For example, if an out-of-network hospital charges $1,500 for an overnight stay and the **allowed amount** is $1,000, you may have to pay the $500 difference. (This is called **balance billing**.)
- This plan may encourage you to use In-Network **Provider** by charging you lower **deductibles**, **copayments** and **coinsurance** amounts.

About these Coverage Examples:

These examples show how this plan might cover medical care in given situations. Use these examples to see, in general, how much financial protection a sample patient might get if they are covered under different plans.

This is not a cost estimator.

Don’t use these examples to estimate your actual costs under this plan. The actual care you receive will be different from these examples, and the cost of that care will also be different.

See the next page for important information about these examples.

Questions and answers about the Coverage Examples:

What are some of the assumptions behind the Coverage Examples?

- Costs don’t include premiums.
- Sample care costs are based on national averages supplied by the U.S. Department of Health and Human Services, and aren’t specific to a particular geographic area or health plan.
- The patient’s condition was not an excluded or preexisting condition.
- All services and treatments started and ended in the same coverage period.
- There are no other medical expenses for any member covered under this plan.
- Out-of-pocket expenses are based only on treating the condition in the example.
- The patient received all care from in-network providers. If the patient had received care from out-of-network providers, costs would have been higher.

Does the Coverage Example predict my own care needs?

❌ No. Treatments shown are just examples. The care you would receive for this condition could be different based on your doctor’s advice, your age, how serious your condition is, and many other factors.

Does the Coverage Example predict my future expenses?

❌ No. Coverage Examples are not cost estimators. You can’t use the examples to estimate costs for an actual condition. They are for comparative purposes only. Your own costs will be different depending on the care you receive, the prices your providers charge, and the reimbursement your health plan allows.

Can I use Coverage Examples to compare plans?

✅ Yes. When you look at the Summary of Benefits and Coverage for other plans, you’ll find the same Coverage Examples. When you compare plans, check the “Patient Pays” box in each example. The smaller that number, the more coverage the plan provides.

Are there other costs I should consider when comparing plans?

✅ Yes. An important cost is the premium you pay. Generally, the lower your premium, the more you’ll pay in out-of-pocket costs, such as copayments, deductibles, and coinsurance. You should also consider contributions to accounts such as health savings accounts (HSAs), flexible spending arrangements (FSAs) or health reimbursement accounts (HRAs) that help you pay out-of-pocket expenses.

What does a Coverage Example show?

For each treatment situation, the Coverage Example helps you see how deductibles, copayments, and coinsurance can add up. It also helps you see what expenses might be left up to you to pay because the service or treatment isn’t covered or payment is limited.
