LASC - Business Terms with Microsoft:

I have been working with Microsoft as one of our partners since 2017. As a result of this important relationship, on 9/29/22 I received an email from Microsoft indicating that our institution has been identified as a good candidate for the Microsoft Learn for Educators program.

Since that time, I have been trying to get the Business Terms (**PR 10061589**) to be signed by our institution, so we can move forward with the program. I learned that the Business Terms must be approved by the Board of Trustees.

Based on the information provided by the district, I learned that the agreement was on the board's agenda for March to be approved. Based on the information provided, I communicated to Microsoft that the terms is on the board's agenda for March. In April when I inquired about the status of the Business Term, I learned that the Microsoft Business Terms was pulled from the Board of Trustees agenda by IT. Why did IT pull it out? How long will IT take to review the terms? What is the process for the MOU to be approved by the board? And why does it take long time? Why was there no communication to our campus that the item was pulled by IT?

Last email inquiring about the status of the Business Terms (**PR 10061589**) was sent by my dean on 4/25/2023 (no answer yet). Last update that I received about the Business Terms was on 2/28/2023. I have been in this cycle back and forth and investing invaluable time (including my department chair, my dean and myself) Why other Colleges can sign their terms quicker than us? We start a project as leader and then we end up as a follower because of unclear process and a bottle neck that is absolutely hard to overcome. I need your help...

Please note: Chain of emails will be provided as evidence upon request.

Naja "

Thanks

Robert
